

# Instructions to Configure a GoDaddy.com Domain for use with your Autoclick Website

Although these instructions are specific for GoDaddy.com, the general steps for making the changes are for the most part the same in most domain registrars. If you have questions or need assistance with other registrars please call our support line at 614-827-1189.

1. Login to your account at <http://www.godaddy.com>.

2. Expand the Domains section...

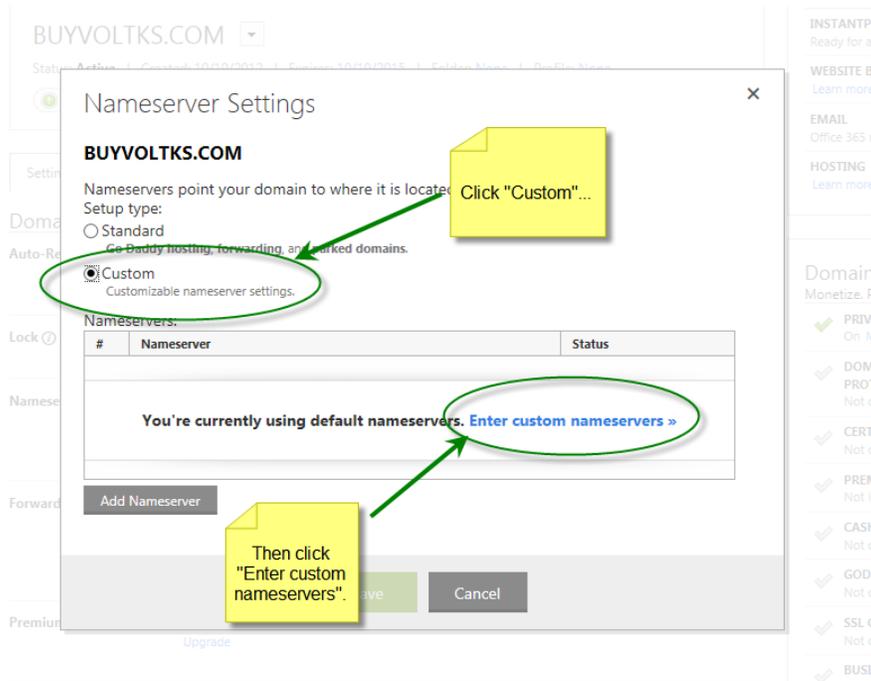

and click the "Launch" button for your domain.

The screenshot shows the GoDaddy Domains management interface. At the top, there are navigation tabs for Products, Payments, Renewals, Account Summary, and Settings. Below this is a header with the GoDaddy logo, a 'Give feedback' link, and a 'Launch' button. The main content area has tabs for Domains, Transfers, Auctions, and My Bids. A search bar labeled 'Jump to domain' is present. Below the search bar is a table with the following columns: My Domains, Expires, Registration Type, Associated Products, and Action. The table lists five domains: buyvoltkansas.com, buyvoltks.com, buyvolttoday.com, getvoltnow.com, and kansasvolt.com. Each domain has a 'Launch' button in the Action column. A yellow callout box with the text 'Click the "Launch" button for the domain.' has a green arrow pointing to the 'Launch' button for buyvoltks.com. At the bottom of the table, it says 'Displaying 1-5 of 7 domains' and 'Results per page: 5'. There are also navigation arrows and a 'Need another domain? Search Now!' link.

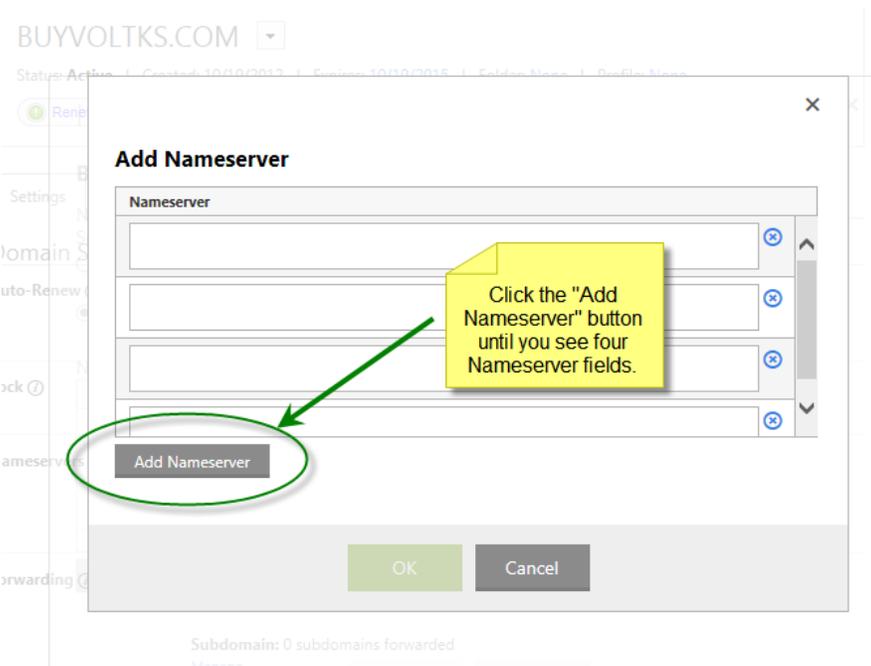

3. Click "Manage" in the Nameservers section.

The screenshot shows the GoDaddy Domain Details page for BUYVOLTCS.COM. The browser address bar shows 'https://dcc.godaddy.com/dcc50/DomainData'. The page has a navigation bar with 'My Account', 'Domains', 'Buy & Sell', 'Settings', and 'Help'. The main content area is titled 'Domain Details' and shows 'BUYVOLTCS.COM' with a dropdown menu. Below this, there are buttons for 'Renew', 'Upgrade', 'Buy & Sell', 'Account Change', and 'Delete'. There are also tabs for 'Settings', 'DNS Zone File', and 'Contacts'. The 'Domain Settings' section includes 'Auto-Renew', 'Lock', 'Nameservers', and 'Forwarding'. The 'Nameservers' section shows 'NS43.DOMAINCONTROL.COM' and 'NS44.DOMAINCONTROL.COM' with a 'Manage' link circled in green. A yellow callout box with the text 'Click "Manage" in the Nameservers section.' has a green arrow pointing to the 'Manage' link. On the right side, there are sections for 'Account Snapshot' (InstantPage, Website Builder, Email, Hosting) and 'Domain Enhancements' (Privacy, Domain Ownership Protection, Certified Domain, Premium Listing, CashParking, Godaddy Auctions).

4. Click "Custom"

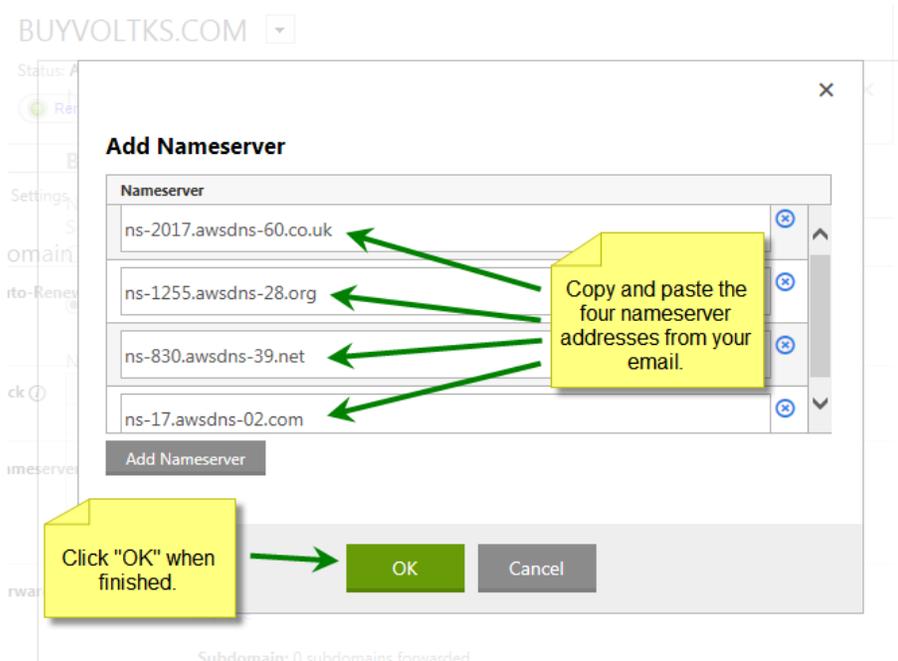

5. Click the "Add Nameserver" button until you see four Nameserver fields.

6. **IMPORTANT: Do not enter the nameservers shown in screen capture below. These will not work for your site and are for illustration purposes only.**

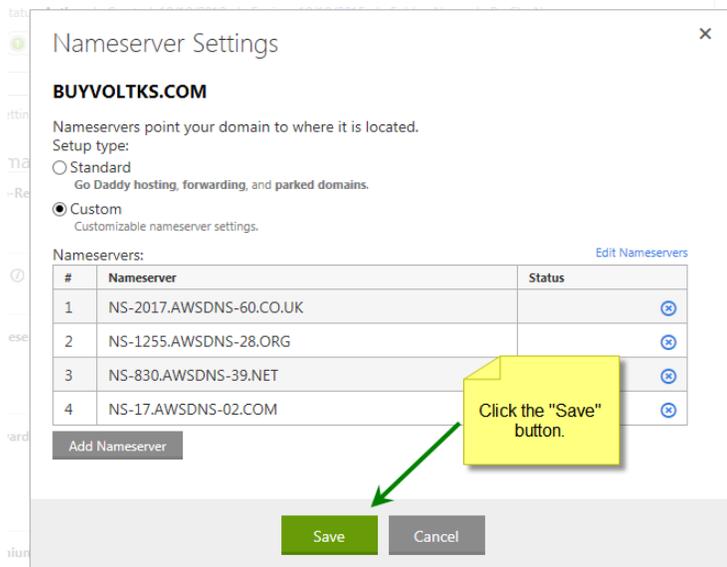

Copy and paste the nameservers listed on your email. If you do not have an email from Autoclick with your nameservers, please call 614-827-1185 and ask for it to be resent.

You will need to enter at least two of the four listed. If you can enter all four, please do so. Double check the nameservers as they will not be the same as entered in this document

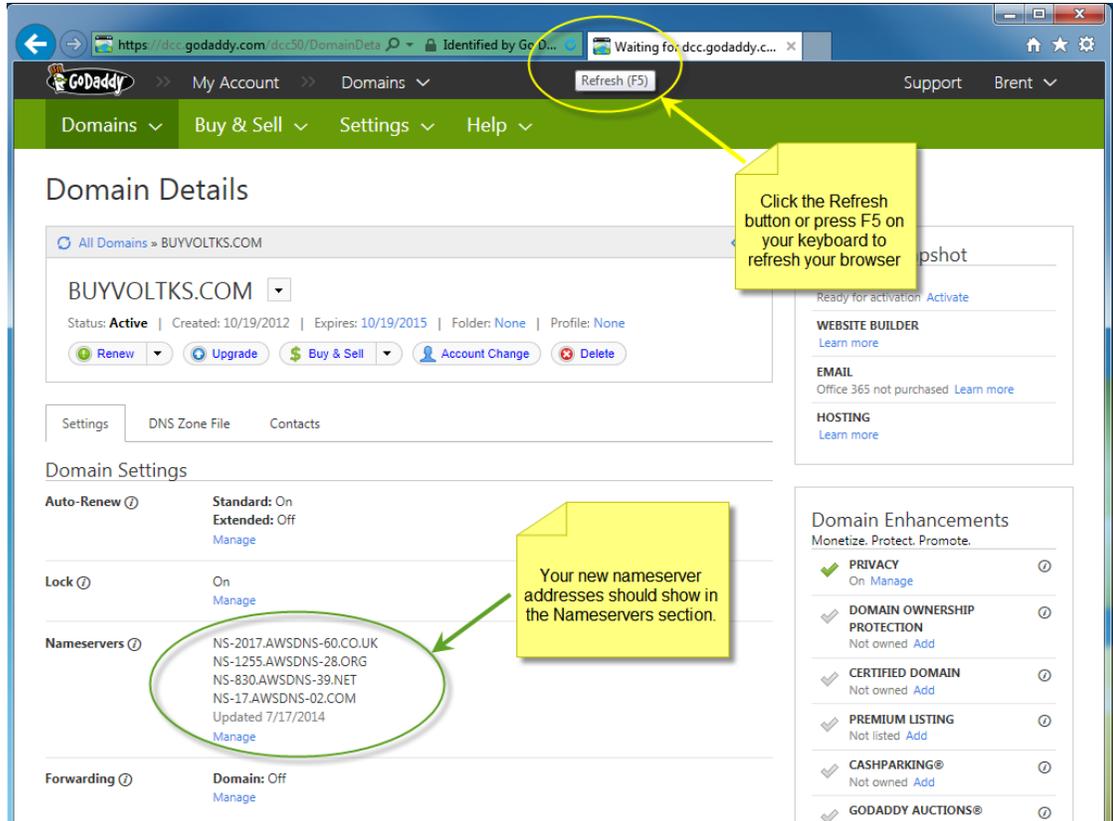

Click on OK when finished entering the nameservers.

7. Click the "Save" button on the next screen.

8. Click the Refresh button or press F5 on your keyboard to refresh your browser. Your new nameserver addresses should show in the Nameservers section.

If you have any questions or need assistance with a registrar other than GoDaddy.com, please call 614-827-1189.
